

Orthopedic Foundation for Animals Preliminary (Consultation) Report

MELORICH'S KORA
registered name

ALAA013878
registration number

LABRADOODLE
breed

F
sex

APRICOT
color

8/3/2008
date of birth

016 123 600
tattoo/microchip/DNA profile

6
age at evaluation in months

1360509
application number

3/6/2009
date of report

film/case no(s)

Owner
RICHARD MARTEL
24419 DUFFIELD RD
BEACHWOOD, OH 44122

Veterinarian
ANIMAL CLINIC NORTHVIEW
36400 CENTER RIDGE RD
NORTH RIDGEVILLE, OH 44039

RADIOGRAPHIC EVALUATION OF PHENOTYPE WITH RESPECT TO HIP/ELBOW DYSPLASIA

* The study must be repeated when the animal is 24 months of age or older to qualify for OFA numbers.

|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>_____ EXCELLENT HIP JOINT CONFORMATION*
superior hip joint conformation as compared with other individuals of the same breed and age</p> <p>✓ _____ GOOD HIP JOINT CONFORMATION*
well formed hip joint conformation as compared with other individuals of the same breed and age</p> <p>_____ FAIR HIP JOINT CONFORMATION*
minor irregularities of the hip joint conformation as compared with other individuals of the same breed and age</p> | <p>_____ BORDERLINE HIP JOINT CONFORMATION
marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time – Repeat study in six months</p> <p>_____ MILD HIP DYSPLASIA
radiographic evidence of minor dysplastic changes of the hip joints</p> <p>_____ MODERATE HIP DYSPLASIA
well defined radiographic evidence of dysplastic changes of the hip joints</p> <p>_____ SEVERE HIP DYSPLASIA
radiographic evidence of marked dysplastic changes of the hip joints</p> |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

HIP JOINTS - STANDARD VD VIEW

- _____ subluxation
- _____ remodeling of femoral head/neck
- _____ osteoarthritis/degenerative joint disease
- _____ shallow acetabula
- _____ acetabular rim/edge change
- _____ unilateral pathology _____ left _____ right
- _____ transitional vertebra
- _____ spondylosis
- _____ panosteitis
- _____ other

RADIOGRAPHIC FINDINGS

ELBOW JOINTS – FLEXED LATERAL VIEW

✓ _____ negative for elbow dysplasia ✓ _____ L ✓ _____ R

ELBOW DYSPLASIA

Grade I	L _____	R _____
Grade II	L _____	R _____
Grade III	L _____	R _____

RADIOGRAPHIC FINDINGS

degenerative joint disease (DJD)	L _____	R _____
united anconeal process (UAP)	L _____	R _____
fragmented coronoid process (FCP)	L _____	R _____
osteochondrosis	L _____	R _____
